

AGM 12-90: The Swiss Army Knife of Deep-Cycle Batteries

AGM 12-90: The Swiss Army Knife of Deep-Cycle Batteries

Why This Battery Type is Stealing the Spotlight

Imagine a battery that works as hard as a caffeinated squirrel - that's your AGM 12-90 in a nutshell. This 12V/90Ah beast combines the raw power of a car starter battery with the endurance of deep-cycle storage, making it the go-to choice for marine enthusiasts and off-grid adventurers. Unlike your ex's mixed signals, AGM technology gives crystal-clear performance: no leaks, no maintenance, and no sulfuric acid surprises.

Technical Specs That'll Make Engineers Swoon

Cold Cranking Amps: 570A (SAE) / 360A (DIN) - enough to jump-start a small spacecraft

Cycle Life: 1,200 cycles at 50% depth of discharge (DoD) - outlasting most smartphone relationships

Self-Discharge Rate:
