PT12-150 12.8V 150Ah Union Battery: Power Solution for Critical Applications

## **When Reliability Meets Innovation**

Imagine your hospital's backup power system activating during a storm - that's where the Union Battery PT12-150 becomes the unsung hero. This 12.8V 150Ah beast isn't just another power source; it's the result of 45+ years of Korean engineering excellence. Born from the same DNA that powered the 1988 Seoul Olympics, this VRLA (Valve-Regulated Lead-Acid) battery combines military-grade reliability with commercial practicality.

## **Technical Specifications That Matter**

Voltage/Capacity: 12.8V nominal voltage with 150Ah @ 20-hour rate

Terminal Design: Universal M8 threaded terminals for secure connections

Cycle Life: 1,200 cycles at 50% DoD (Depth of Discharge)

Self-Discharge:
