

Understanding RT-4KTL-25KTL REGITEC: Industrial-Grade Circuit Protection Solutions

What Makes RT-4KTL-25KTL REGITEC Stand Out?

In the realm of industrial electrical protection, the RT-4KTL-25KTL REGITEC represents a sophisticated solution for high-voltage applications. Designed for three-phase systems up to 1140V AC, this adjustable leakage relay combines precision monitoring with robust fault response mechanisms. Unlike basic circuit breakers, it employs zero-sequence current transformers to detect differential currents as low as 30mA - crucial for preventing equipment damage and ensuring worker safety.

Core Technical Specifications

Voltage range: 220V-1140V AC

Adjustable trip threshold: 50mA-30A

Response time:
