

Understanding the TSG-B10-60KVA Power Regulation System

What Makes the TSG-B10-60KVA Stand Out?

Imagine trying to power a small manufacturing facility with fluctuating energy demands - that's where specialized equipment like the TSG-B10-60KVA becomes crucial. This industrial-grade power regulation system combines transformer and voltage stabilization capabilities, designed for operations requiring precise 60kVA capacity with TSG-B10 series specifications.

Key Technical Specifications

Rated capacity: 60kVA (±0.5% voltage regulation accuracy)

Input voltage range: 380V±15% (three-phase)

Output voltage: 0-500V continuously adjustable

Waveform distortion:
